- › Mastering product and production ramp-ups
- › Ensuring project management success
- › Leading acquisitions to success

Shaping the future

- › Planning new plants, production or logistics sectors
- › Designing future-proof IT landscapes
- › Defining strategies and achieving corporate goals
- › Optimizing company organization
- › Developing employees
- › Ensuring competitiveness and opening up new markets

BLSG AG services: strategy to implementation

Operational Excellence

- › We create transparency along the entire value chain.
- › We identify potential for efficiency improvement in direct and indirect areas.
- › We implement optimization measures with direct impact on results.

Supply Chain Management and Logistics Planning

- › We develop supply chain strategies (network, sourcing, inbound, inhouse and outbound).
- › We manage ramp-ups to smooth operation.
- › We implement sustainable logistics systems.
- › We secure complex planning through simulations.

Digitalization and Industry 4.0

- › We digitize and automate processes to increase productivity.
- › We realize the industry 4.0 of your company (IoT, Robotic Process Automation, Process Mining).
- › We design efficient IT landscapes (requirement definition to rollout).

Site and Factory Planning

- › We develop, analyze and evaluate footprint and site scenarios.
- › We justify make-or-buy- and outsourcing-decisions.
- › We plan factory and area layouts.
- › We design your production planning and control.

Project and Change Management

- › We are certified and internationally experienced experts for interdisciplinary project management (IPMA, SCRUM).
- › We combine classic and agile methods in a time-, cost- and implementation-oriented manner.
- › We coach project members professionally as a basis for change in the company.

Corporate Development

- › We provide target directions with benchmarking.
- › We prepare the basis for investment decisions.
- › We support restructuring and reorganization.

Product and Value Analysis

- › We optimize products by means of value analysis.
- › We develop sustainable product strategies.
- › We analyze and evaluate the market potential and benefits of products.

Implementation consultancy for operations

- > We provide highly qualified **experts**, years of international **experience** and the necessary **capacities**.
- > We are motivated **team players**.
- > We find **innovative** solutions and think **sustainably**.
- > Our work is **pragmatic** and **result-oriented**.
- > We ensure **maximum efficiency** in your processes.
